Week 48: Coupled cluster theory and summary of course

Morten Hjorth-Jensen[1]

**Department of Physics and Center for Computing in Science Education,
University of Oslo, Norway[1]**

November 24-28, 2025

Week 48, November 24-28, 2025

1. Thursday:
   1.1 Short repetition from last week
   1.2 How to write your own coupled-cluster theory code, pairing model example
   1.3 Coupled cluster theory, singles and doubles excitations, diagrammatic expansion
   1.4 Video of lecture at `https://youtu.be/wVbJ82zpHsU`
   1.5 Whiteboard notes at `https://github.com/ManyBodyPhysics/FYS4480/blob/master/doc/HandwrittenNotes/2024/NotesNovember28.pdf`

2. Friday:
   2.1 Coupled cluster theory for singles and doubles excitations using a diagrammatic derivation
   2.2 Summary of course and discussion of final oral exam

3. Lecture material: Lecture notes and Shavitt and Bartlett chapters 9 and 10. See also slides at `https://github.com/ManyBodyPhysics/FYS4480/blob/master/doc/pub/week48/pdf/cc.pdf`

CCSD with twobody Hamiltonian

Truncating the cluster operator $\hat{T}$ at the $n = 2$ level, defines CCSD approximation to the Coupled Cluster wavefunction. The coupled cluster wavefunction is now given by

$$|\Psi_{CC}\rangle = e^{\hat{T}_1 + \hat{T}_2}|\Phi_0\rangle,$$

where

$$\hat{T}_1 = \sum_{ia} t_i^a a_a^\dagger a_i$$

$$\hat{T}_2 = \frac{1}{4} \sum_{ijab} t_{ij}^{ab} a_a^\dagger a_b^\dagger a_j a_i.$$

Two-body normal-ordered Hamiltonian

$$\hat{H} = \sum_{pq} \langle p|\hat{f}|q\rangle \left\{ a_p^\dagger a_q \right\} + \frac{1}{4} \sum_{pqrs} \langle pq|\hat{v}|rs\rangle \left\{ a_p^\dagger a_q^\dagger a_s a_r \right\}$$

$$+ \text{E}_0$$

$$= \hat{F}_N + \hat{V}_N + \text{E}_0 = \hat{H}_N + \text{E}_0,$$

where

$$\langle p|\hat{f}|q\rangle = \langle p|\hat{h}_0|q\rangle + \sum_i \langle pi|\hat{v}|qi\rangle$$

$$\text{E}_0 = \sum_i \langle i|\hat{h}_0|i\rangle + \frac{1}{2} \sum_{ij} \langle ij|\hat{v}|ij\rangle.$$

Diagrammatic and algebraic derivations of T_1 and T_2 amplitude equations

See lecture material: Lecture notes and Shavitt and Bartlett chapters 9 and 10. See also slides at
