

VQE for $N = 2$, $\hbar\omega = 1$, $K = 2, 6, 12$ - Jordan-Wigner + parameter-shift gradients

VQE K=12 convergence
6 starts, 2-stage NM→L-BFGS-B

Final K=12 energies per run

K-convergence: $E_0(K) \rightarrow E_{\text{FCI}}^\infty$
